KOLMÖ

Handcrafted Lighting from Spain

Kolmö Studio was established in 2021 by Alfredo Benito and Sheila Escudero in Burgos, Spain. After six years of drawing inspiration and creating synergy between architecture and interior design, we decided to bring this deeply personal project to life.

From our home workshop, we specialize in designing and crafting lighting pieces and artworks using natural stones. Each piece is meticulously handcrafted with the utmost passion, blending design, art, avant-garde elements, simplicity, and elegance.

Our use of pure, pristine materials imparts a sense of timelessness and functionality. Natural stone stands at the core of our creations, with its weathered fractures enhancing each design and reflecting the material's transformation and history. At our studio, we embrace this natural asymmetry to craft truly unique pieces.

"We pour our soul, hands, and ideas into each piece to create art that illuminates."

"Art that Illuminates"

KOLMÖ

Handcrafted Lighting from Spain

All our designs are exclusively tailored to the professional sector. We adapt to any space and project requirements.

We collaborate with interior design studios, architecture firms, art exhibitions, as well as design, decoration, and lighting stores.

A modern outdoor pool area at dusk. The pool is filled with clear blue water, reflecting the sky and the surrounding landscape. Along the back edge of the pool, there is a row of five lounge chairs with white cushions and dark frames. Behind the chairs is a dark wooden fence and a line of trees, including several tall pine trees. The sky is a deep blue. In the foreground, on the right side, there is a tall, rectangular, light-colored stone sculpture with a dark vertical slot through its center, which is illuminated from within, casting a warm glow. The ground around the pool is paved with light-colored stone tiles.
